

TOR Technology - Carpet floor

TOR43 is an innovative single disc machine that is particularly suitable for heavy duty cleaning tasks. The machine uses an orbital movement which increases productivity compared with a traditional single disc machine. By using high frequency oscillations, this machine offers excellent stability and manoeuvrability, despite a total weight of 65 kg (not including accessories). When working with water, the TOR43 enables considerable savings as the water is constantly held within the disc area by the orbital movement, and is not dispersed. In addition, the distinctive orbital movement makes it very easy for any operator to use the TOR43 machine, reducing training times and eliminating the need for any particular degree of physical strength.

The low current absorption of this machine means that it can even be used together with a vacuum cleaner, with both appliances powered by standard mains voltage.

TOR 43 enables several operations to be performed using the same machine, simply by changing the accessories.

**SCRUBS, POLISHES, DE-WAXES, ROUGHS, REFINISHES, GRINDS AND RESTORES
WAXES, PVC, LINOLEUM, MARBLE, GRANITE, TERRAZZO, CERAMIC, EARTHENWARE,
CEMENT,
PARQUET AND CARPET FLOORS.**

Carpet floor cleaning with microfiber disc and cotton pad

A FEW TIPS REGARDING PROCEDURES FOR RESTORING CARPET FLOORING

For improved operation, it is advisable to decrease the weight of the Tor 43 by removing the weight fitted as standard, which totals 17 kg.

Maintenance cleaning

(Dirty carpet floor)

Microfiber and polyester

Cotton

WHAT TO USE:

- A **TOR 43** orbital single disc machine, pad holder and pad in microfiber or cotton.
- Can be used with just water, or with a specific detergent, ideally without solvents and surfactants.

- **On a dry floor, before using the single disc machine, remove any dry dirt using an upright vacuum cleaner.**

- **Subsequently, spray the carpet floor with the specific product selected. TOR 43 can be equipped with spray kits with 2 nozzles which can easily be activated from the handle.**

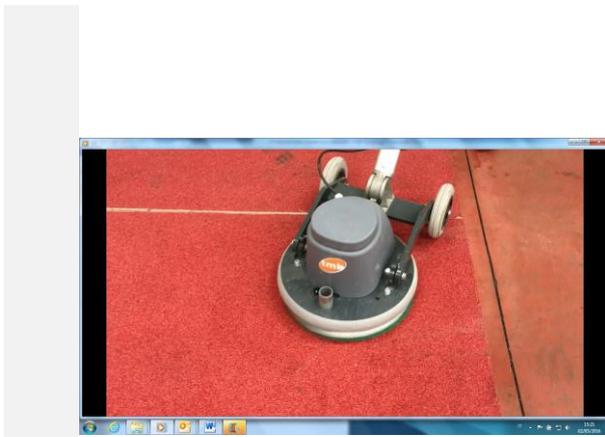

Button on handle for controlling the function of the 2 spray nozzles

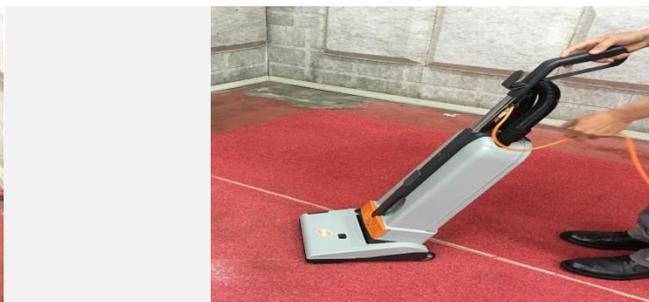

- **First work on stubborn stains by directly spraying the same pure product onto these.**
- **Dampen and spray the microfiber disc with the product, and move slowly over the carpet floor.**
- **Repeat the operation if necessary.**

- *When the floor is clean...*

.....and when the carpet floor is dry, after around 10/15 minutes, pass the upright vacuum cleaner over the surface to “comb” the carpet floor.

Complete equipment for CARPET FLOOR

- ✓ **TOR 43** orbital single disc machine (**without weights**)
 - ✓ **2-nozzle spray kit** on the machine
 - ✓ Electric extension cable with EU plug
 - ✓ 15 l tank.
 - ✓ Velcro pad holder
 - ✓ Pad in microfiber for carpet floors, or in cotton
 - ✓ TMB UPRIGHT VACUUM CLEANER
-
- ✓ **TMB Product specifically designed for scrubbing and removing stains on carpet floors**
